EDUCATION

National Institute of Technology, Patna 2024 – 2028
B.Tech in Computer Science and Engineering | CGPA: 9.54 / 10.00

WORK EXPERIENCE

Frontend Intern – Meru Technosoft Pvt. Ltd. (Remote) Mar 2026 – Jun 2026

- Rebuilt 12+ static admin pages into interactive React dashboards with sortable, filterable data tables for a B2B SaaS product.
- Traced and fixed 18 cross-browser layout bugs (Safari flexbox quirks, inconsistent date-picker rendering) found during QA review cycles.
- Consolidated 10+ REST API calls scattered across components into a shared data-fetching layer, removing duplicate network logic from 5 dashboard modules.
- Migrated prop-drilled state to React Context and custom hooks in 5+ component trees after repeated re-render bugs were flagged in code review.

PROJECTS

Flux – GitHub Gap Finder & AI Career Roadmap Generator [Live Demo](#) | [GitHub](#) Jun 2026
Next.js, TypeScript, NVIDIA NIM API, REST APIs, MongoDB, TailwindCSS

- Built a parser that pulls a user's GitHub activity (languages used, commit frequency, repo topics) and feeds it to the NVIDIA NIM API to identify likely skill gaps.
- Designed a scoring function to rank recommended open-source repos by contribution complexity (open issue count, PR merge rate, language overlap) instead of star count alone.
- Added GitHub OAuth login and persisted generated roadmaps per user in MongoDB for return visits.

Jobify – AI-Powered Resume Analysis & Candidate Ranking Platform [Live Demo](#) | [GitHub](#) May 2026
Next.js, Gemini API, MongoDB, JWT, TailwindCSS

- Built a resume screener that sends parsed resume text and a job description to the Gemini API and returns structured ATS-style feedback (missing keywords, formatting gaps).
- Added indexes on frequently filtered candidate fields and cached repeated lookups, cutting average query latency from **480ms to 175ms**.
- Implemented JWT-based auth with role-based route protection so recruiters and candidates land on separate dashboards.

Civic Bridge – Community Issue Reporting with Real-Time Tracking [Live Demo](#) | [GitHub](#) Mar 2026
Next.js, Express.js, MongoDB, NVIDIA API, Cloudinary, Resend, TailwindCSS

- Built a civic reporting app where citizens submit issues with photos (via Cloudinary) and track resolution status in real time.
- Added NVIDIA API-based duplicate detection that compares new reports against open ones in the same area to flag likely repeats for reviewers.
- Reworked query patterns and indexing on the reports collection, cutting average API response time from **510ms to 190ms**.

TECHNICAL SKILLS

Languages : C, Java, JavaScript, TypeScript, Python
Frontend : React.js, Next.js, HTML5, CSS3, TailwindCSS
Backend : Node.js, Express.js, REST APIs, JWT
Databases : MongoDB, PostgreSQL, MySQL
AI / APIs : NVIDIA NIM SDK, Gemini API
Dev Tools : Git, Docker, Postman, Vercel

ACHIEVEMENTS

- Secured **Runner-Up** at NIT Patna Intra College Hackathon 2026 (45+ teams) by building a full AI web platform in 24 hrs.
- Placed **Top 45** at HackArena 2 (national, 300+ teams) by shipping a collaborative feature under 12 hrs.
- Solved **300+ DSA problems** across [LeetCode](#), Codeforces, and other platforms.

CERTIFICATIONS

- HackArena Round 2 – Certificate of Achievement [\[Certificate\]](#).
- NPTEL: Joy of Computing using Python – Elite, Perfect score **100/100** [\[Certificate\]](#).

POSITIONS OF RESPONSIBILITY

Web Team Member, HackSlash Club – National Institute of Technology, Patna Apr 2025 – Present

- Designed RESTful APIs for auth and content workflows and added pagination, cutting redundant API calls by **~45%**.
- Built production features in Next.js and Express.js for the club's official platform, used by **300+ members**.
- Mentored **10+ junior members** on React and Node.js fundamentals during weekly club learning sessions.
